

Symphony Industrial AI CEO Delivers Keynote at eChemExpo 2022

Dominic Gallelo will address how third-generation AI methods achieve improved asset health and high process yield

Woburn, MA – April 20, 2022 - Symphony IndustrialAI announced today that CEO Dominic Gallelo will deliver a keynote presentation at eChemExpo 2022 on April 20th. He will also join a panel discussion on "Managing the speed and quality of decision making with digital transformation" at the Kingsport, Tenn. event.

Mr. Gallelo will address the rapid adoption of AI-driven multi-variate analysis in process manufacturing for asset health and process optimization. He will present real-world use cases and strategies where technology that directly addresses these trends makes assets more reliable and manufacturing processes more efficient and sustainable.

The panel discussion will focus on optimizing operations using the digital transformation of industrial assets and asset performance management, driving value beyond predictive maintenance, and turning raw data into knowledge and information for decision-making.

Symphony IndustrialAI

Symphony IndustrialAI, a SymphonyAI business, is an innovator in industrial insight, accelerating autonomous plant operations. The industry-leading EurekaAI/IoT platform and industrial optimization solutions connect tens of thousands of assets and workflows in manufacturing plants globally and process billions of data points daily, pushing new plateaus in operational intelligence.

- Digital manufacturing composable enterprise MOM/MES solutions can be operational in 90 days to connect devices, processes, people, and systems with harmonizing plant automation and control.
- Plant performance applications span asset predictive maintenance and process health and optimization, maintaining high availability of equipment, extending the life of capital assets, and reducing process variability.
- Connected frontline worker solutions mobilize people to handle even their most complex processes away from their desks with human-driven procedure and instruction support, using a combination of glasses, smartphones, tablets, and PCs.

Symphony IndustrialAI solutions provide high value to users by driving variability out of processes and optimizing operations for throughput, yield, energy efficiency, and sustainability.

About SymphonyAI

SymphonyAI is building the leading enterprise AI company for digital transformation across the most important and resilient growth industries, including retail, consumer packaged goods, financial services, manufacturing, media, and IT service management. SymphonyAI businesses have many leading enterprises as clients in each of these industries. Since its founding in 2017, SymphonyAI has grown rapidly, approaching 2,000 talented leaders, data scientists, and other professionals. SymphonyAI is an SAIGroup company, backed by a \$1 billion commitment from successful entrepreneur and philanthropist Dr. Romesh Wadhvani.
