

CINDE CPG Enterprise Suite

Empowering CPGs with real-time, data-driven decisions

The CPG industry is at a crossroads.

With fragmented data, siloed functions, and an increasingly competitive landscape, CPG companies are struggling to keep pace. Manual tasks consume valuable employee bandwidth, while the lack of real-time insights leads to missed opportunities. But what if there was a solution that could transform these challenges into opportunities?

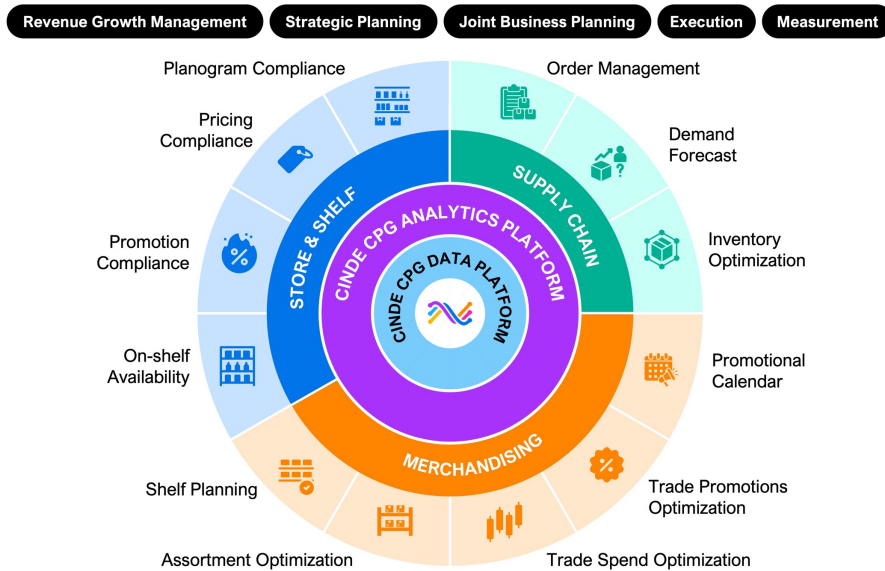

Imagine if you could access critical insights across your business instantly, create optimized promotional calendars in minutes, and reallocate trade spend with just a few clicks. Imagine leading the future of revenue growth management with a unified, AI-powered view of your entire operation. This is the power of AI for CPG, and SymphonyAI is providing the solution with groundbreaking predictive, generative, and agentic AI.

The future of revenue growth management

The CINDE CPG Enterprise Suite is a beacon of innovation delivering a unified, AI-driven set of applications transforming raw, disparate data into actionable insights across sales, merchandising, promotions, and assortment. By anticipating market shifts, optimizing shopper engagement, and driving sustainable growth, you're not just adapting to change – you're leading it. Unified data, precision decision-making, and speed to action underpin every aspect of the CINDE CPG Enterprise Suite, ensuring sustainable, consumer-focused revenue growth management.

The CINDE CPG Enterprise Suite is revolutionizing every aspect of CPG operations.

Get a unified view of your entire operation – from HQ to supply chain, all the way to the store, SymphonyAI can integrate disparate data sources to provide real-time insights across your business, driving revenue growth and saving your team hours each week.

The impact

Driving tangible value

6 - 10% incremental revenue uplift	3 - 5% EBITDA growth	25% time saved each week	5 - 10% boost in promotional ROI	2 - 5% increased trade spend efficiency
